## PROFESSIONAL EXPERIENCE

### MEDIAFLY, INC., CHICAGO, IL (REMOTE)

---

*Senior Software Engineer, Data and Client Squad*

*Aug. 2022 – Feb. 2023*

- Extended a Python back-end service handling customer integration with Salesforce's API to allow the creation of new custom objects holding metadata.
- Improved the Python video call processing pipeline, filtering out unwanted blocks of silence.
- Corrected multiple occurrences of temporary files not being cleared and other data inconsistencies in the Python pipeline code.

### TEMPO OK TECNOLOGIA EM METEOROLOGIA LTD., SÃO PAULO, SP

---

*Senior Full-Stack Developer*

*June 2020 – Aug. 2022*

- Built and administered the public-facing website with Django, including custom user management and authentication with a JWT extension.
- Architected a PostgreSQL database in Google Cloud Platform to store meteorological observation and forecast time series at client-supplied locations and government-operated stations.
- Built FastAPI endpoints to communicate with a PostgreSQL database using Google Cloud Functions and Cloud Run, leveraging Docker containers and Bitbucket's Continuous Deployment pipeline.
- Created a geospatial dashboard containing satellite imagery overlays computed from NASA's scientific data and weather stations' historical data, obtained by accessing their public APIs.
- Created a hydroelectric energy forecasting dashboard containing Google Maps and Apache ECharts widgets in Vue.js and the Vuetify Material Design front-end framework.

### PONTUAL EXPORT & IMPORT LTD., SÃO PAULO, SP

---

*Full-Stack Developer*

*Jan. 2014 – June 2020*

- Used MA (Moving Average) indicators in a Django and Python project to predict the demand for 600 products and calculate appropriate amounts for restocking.
- Prepared sales forecasts and summarized business-critical statistics in a Django app.
- Created a REST API with the Slim micro framework in PHP to be consumed by a React app that rendered the company's website.
- Visualized historical sales with NumPy and Pandas, reporting totals and outliers for each product.
- Created a Single-Page App with AngularJS and Firebase to organize product reservations by clients and their assigned salesperson in real-time.

## EDUCATION

### NEW YORK UNIVERSITY, NEW YORK, NY

---

*M.S. in Financial Mathematics, 2009*

### STANFORD UNIVERSITY, STANFORD, CA

---

*M.S. in Materials Science and Engineering, 2007*

*B.S. in Mathematical and Computational Sciences, 2005*

## PERSONAL PROJECTS

- *Alexie Beans* – A Django app implementing double-entry accounting rules, used for managing personal finances and budgeting.
- *Polylexis* – A Django app containing Greek vocabulary quizzes and a built-in dictionary.
- *Cooking Diary* – A vanilla JavaScript app that records which dishes were consumed daily, including the ingredients making up each dish.
